

Description of Training

COMOS Training Basic

The COMOS Training Basic is intended for planners, drafters or future COMOS-administrators. It imparts the philosophy of COMOS, the usage of the navigator and the creation of structures and engineering objects.

Also, tools like queries and bulk processing and the topics interfaces and working layers will be introduced.

This training with its numerous, self-contained tutorials enables the participant to get started on COMOS and to work on engineering projects within the navigator.

Preconditions: none

Attendance: min. 3, max. 6 persons

Duration: 2 days

Contents:

COMOS software basics

- Object orientation in COMOS

Structures within the navigator

- The navigator and its tabs
- Projects and structures
- Context menu

Properties and attributes

- Inheritance, tabs
- Linking of attributes

Queries and bulk processing

- User defined queries and modifications
- Saving and exporting

Interfaces

- Excel import

Working layers

- Documentation of different projects states or phases
