

Description of Training

COMOS Training P&ID

The COMOS Training P&ID (graphic-oriented engineering) is intended for planners, drafters or project co-workers. It imparts the philosophy of COMOS, the handling of technical documents and specific engineering objects, that are needed for process engineering.

The participant will learn how to use the appropriate tools effectively and will be trained on special functionalities and features.

This training with its numerous, self-contained tutorials enables the participant to work on projects and process-related engineering within the COMOS module P&ID.

Preconditions: COMOS Basic Training

Attendance: min. 3, max. 6 persons

Duration: 2 days

Contents: **Creating structures & P&ID**

- Unit structure in the navigator
- Documents

Editing graphical objects

- Tools, method

Piping and instrumentation

- Process engineering objects, graphical engineering
- Categorization of objects

Measurement functions and signal engineering

- Measurement positions / functions in a P&ID

Revision and redlining

- Creating, Handling

Documents in COMOS

- Document tools

Special topics

- AutoCAD import, ALIAS Tagging
